

Rinax® Clean H 830

Cream hand wash

Area of application

- For application in industrial and workshop areas, e.g. machine and tool construction, repair workshops, locksmiths
- For medium to heavy industrial dirt

Product properties

- Liquid hand cleaner with environmentally friendly natural abrasives
- Abrasives made from biodegradable natural meal (corn cob grit)
- Cleanses quickly and thoroughly with very good skin compatibility
- Does not cause micro injuries, skin-friendly
- High proportion of skin-caring substances
- pH-value is adapted to the natural acid mantle of the skin
- Solvent and terpene-free
- Dermatologically tested

Application and dosage

- Apply one or two pump strokes to the slightly moistened hand, distribute and rub in, then rinse with water.
- Dosage of the sachet bottle via Rinax® dispenser H 854.
- Consumption: 2 - 5 ml / per application

undiluted

Note

- Detergent dispensers must be thoroughly cleaned or disinfected before refilling (recommendation by the Robert Koch Institute).
- The storage and shelf life in closed containers at room temperature can be preserved for 30 months (from the date of manufacture).
- The respective expiry date is indicated on the packaging.
- The cardboard boxes and plastic packaging can be recycled separately.
- Changes or variations in colour of the product do not impact on the quality. The product image may differ in colour and shape from the original.
- **Safety:** Hazard statements and safety precautions can be found in the relevant safety data sheet, which is available at www.buzil.com.
- **Storage:** Always keep containers closed. Store at room temperature in the original container. Consume opened containers within 9 months.
- **Environmental:** Feed residual emptied containers to the dual system. For detailed information see environmental information.

The data in our product information sheets are based on our experience and careful investigations, and correspond to our present state of knowledge. We are, however, not able to examine and influence in detail the varying conditions for usage and materials, and those at premises where products are to be used. For this reason, we can only provide general information on usage. The quality of the work depends on expert assessment of the premises where products are to be used and how they are in fact employed by the user. In the case of doubt, the latter is obliged at all times to test the compatibility of the material to be treated with the Buzil product on an inconspicuous area or to obtain relevant advice on application technology. Liability for incomplete or incorrect data in our product information sheets shall only be assumed in cases of negligence caused by gross negligence or intent; any claims arising from the Product Liability Act shall remain unaffected. All previous product information shall lose its validity through the above listed product information.
