FLOOR CLEANER

Basic cleaner

CORRIDOR[®] UNIC ULTRA S 707

Universal stripper

Application and dosage

Stripping:
1 - 2,5 l : 10 l water

Top stripping:
500 ml / 10 l water

Spread or spray the solution on the floor and leave to work for a short time. Using the wet scrubbing method with a scrubber dryer, single-disc machine and suitable pad (recommended with a red pad), the surface damage is sanded. Collect the loosened dirt. Wipe the surface wet in one step. The remaining floor finish is then coated across the entire surface, preferably with the same coating as before.

Requirement:
A repairable floor finish layer must still be present (i.e. no signs of wear and tear, except for the floor covering itself).

Note

Always use cold water.
Not suitable for asphalt or bitumen floorings.
Test the covering before application for material compatibility and colour-fastness.
Turn off any underfloor heating before performing basic cleaning.
When using with machines, the tanks should be regularly cleaned and washed.
Changes or variations in colour of the product do not impact on the quality.

Hazard statements

H290 May be corrosive to metals.
H319 Causes serious eye irritation.
